EDUCATION

The University of Texas at El Paso (UTEP)

Expected: May 2027

Bachelor of Science in Computer Science, Major GPA: 3.96

El Paso, TX

- **Relevant Coursework:** Data Structures & Algorithms, Computer Architecture, Operating Systems, Advanced OOP, Database Systems
- **Google Tech Exchange** (Spring 2025): Algorithms & System Design, Intro to Software Engineering with GenAI, Careers in Tech
- **Honors:** College of Engineering Dean's List, Fall 2023 – Spring 2026 | **Certifications:** Meta Front-End Developer, Google Generative AI

SKILLS

Languages: C++, Python, Java, C#, JavaScript, TypeScript, SQL

Libraries/Frameworks: React, Node.js, Express.js, Flask, Streamlit, Playwright, Selenium, Pandas, NumPy, Chart.js, D3.js

Databases: PostgreSQL, MongoDB, Firebase

Technologies: Git/GitHub, GitHub Actions, Google Cloud (BigQuery, Cloud Run), Docker, Microsoft Fabric, Kusto (KQL), .NET 8, IIS, HTML, CSS, Telemetry

AI/Agentic Tools: Model Context Protocol (MCP), Copilot, Ollama, Claude Code, Codex, Cursor, Gemini, ChatGPT

EXPERIENCE

Microsoft

May – August 2026

Software Engineering Intern – Click-to-Run (Deployment), Office Product Group

Redmond, WA

- Cut Office update validation **99.9%**, from ~**1 week** of fleet telemetry to seconds, with a **C++** CLI tool mirroring production update behavior locally
- Reverse-engineered a deprecated busbar driving production update traffic; built a **Kusto** funnel to A/B test and feature-gate it, improving update speed and device adoption **30%**
- Unlocked **Copilot** adoption and build-currency insights with a **Fabric** ETL pipeline joining two previously incompatible telemetry datasets
- Owned all **3** projects end-to-end in a single **12-week** internship, context switching between **C++**, **KQL**, and **Fabric**

Microsoft

May – August 2025

Explorer Intern – Collab Services, Office Product Group

Redmond, WA

- Cut document catch-up time **90%** and boosted user productivity **70%** in a **3-person** pod, building a **Copilot** tool surfacing version-level changes in Office documents
- Raised document comparison accuracy **70%** by extending change-detection logic and optimizing **LLM** prompts for version comparison
- Surfaced **8** product pain points from a **7-participant** user study, driving roadmap decisions in weekly cross-functional Scrum meetings
- Hardened comparison reliability in **C#** and **TypeScript** through stress testing and **TDD**, catching edge cases before rollout

Hunt Institute for Global Competitiveness

September 2025 – May 2026

Software Engineering Intern

El Paso, TX

- Led a **3-person** team building **HIBRED**, a **React/TypeScript**, **.NET 8**, **PostgreSQL** platform serving **1,000+** policymakers across **10+** border-economic modules
- Built an AI chat assistant on a self-hosted **7B-parameter Ollama** LLM, giving stakeholders natural-language access to live chart data
- Eliminated **SQL injection** risk across all public-facing endpoints by replacing dynamic query building with parameterized queries
- Automated wage data collection with a **Python/pandas** ETL pipeline, cutting processing time **95%** and inconsistencies **30%**; published in the [Newsletter](#) and [White Paper](#)

Google

January – April 2025

Google Tech Exchange Class of 2025, Student

Remote

- Shipped a fitness tracking web app to **Google Cloud Run**: **Streamlit** UI over **BigQuery**, **Docker**, **GitHub Actions** CI/CD, with a Google engineer
- Improved query performance **40%** via **BigQuery** optimizations and integrated the **Gemini API** for personalized fitness recommendations

PERSONAL PROJECTS

Jarv Personal Finance MCP Server | Python, Notion API, Model Context Protocol

March 2026

- Cut monthly finance review to **under 60 seconds** with a custom **Python MCP** server turning voice, image, and text commands into live **Notion** operations
- Replaced a suite of financial tools – expense logging, budgeting, paycheck splitting – with one AI-native interface handling **100%** of workflows conversationally

LEADERSHIP

Google Developer Groups

January 2024 – Present

Vice President of Operations

El Paso, TX

- Grew CS department event attendance **30%** leading a **10-person** team across **20+** events, owning budgeting, logistics, and delegation
