## EDUCATION

|                                                                                                                                                     |                                             |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>Bachelor of Science in Computer Science</b><br>The University of Texas at El Paso (UTEP)                                                         | Expected: May 2027<br><b>Major GPA: 4.0</b> |
| <b>Relevant Coursework:</b> Data Structures & Algorithms; Computer Architecture; Automata; Advanced OOP; Calculus II; Discrete Math                 |                                             |
| <b>Honors and Awards:</b> College of Engineering Dean's List - Fall 2023 – Spring 2025, Honors Program Member                                       |                                             |
| <b>Google Tech Exchange - Spring 2025</b>                                                                                                           |                                             |
| <b>Relevant coursework:</b> Algorithms & System Design, Intro to Software Engineering with GenAI, Careers in Tech                                   |                                             |
| <b>Bloomberg Accelerator Program - Summer 2024</b>                                                                                                  |                                             |
| Workshops delivered by Bloomberg Software Engineers: Applied Data Structures and Algorithms (Lists, Linked-List, Trees, Graphs, etc.)               |                                             |
| <b>Certifications:</b> Meta Front-End Developer Professional Certificate; Harvard CS50; Intro to Generative AI, EPCF Microsoft Innovation Hub Cert. |                                             |

## SKILLS

- **Languages:** Python, Java, C#, JavaScript, TypeScript
- **Libraries:** Playwright, Selenium, Thunderclient, Pandas, NumPy, Chart.js
- **Frameworks:** React, Express.js, MongoDB, Node.js, Flask, Streamlit
- **Technologies/Tools:** Git/GitHub, Google Cloud (BigQuery), Docker, Firebase, HTML, CSS

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                       |
